

New Session starts Nov 10th!

Tuesdays 2:45-3:30 ONLINE via Zoom
Nov 10, 17, 24 Dec 1,8,15 (6 weeks) Grades 2-5

KidVets is back with remote Zoom sessions and a curbside adoption event!

Watch a welcome video here: <https://tinyurl.com/y49lg85h>

We will learn about responsible pet ownership, animals of the world, how animal bodies work, signs of illness, and lots of other fun, gross, weird and amazing things veterinarians encounter while doing their jobs!

Students can share their own pets on camera, see the KidVets pets in action at home with Dr Pam, do home scavenger hunts (do you have what you need to adopt a pet? are there any pet dangers in your home? is your home mentally stimulating enough for your pets?), participate in online problem-solving, animal contests, deciphering animal optical illusions, and more!

Our socially-distanced curbside adoption event means that each student will get to adopt a stuffed animal companion to help them learn along the way!

NEW TOPICS EACH SESSION!

Dr. Pam Wittenberg has 30 years of experience in veterinary medicine. When she's not teaching kids about the wonders of science and veterinary medicine, she works as a veterinarian, and teaches human and veterinary anatomy classes at SRJC.
