

New Topics! New session starts Jan 20th!

Wednesdays 3-3:45 ONLINE via Zoom
Jan 20-Feb 24 (6 weeks) Grades 2-5
(email instructor for age exception requests!)

New animal topics and a curbside adoption event each session!

Learn about responsible pet ownership, how animal bodies work, animals of the world, signs of illness in our pets, and lots of other fun, gross, weird and amazing things veterinarians encounter every day. Watch our welcome video: <https://bit.ly/37T0JMB>

Students can share their own pets on camera, see the KidVets pets in action at home with Dr Pam, do home scavenger hunts, debate with their classmates (Do dogs sweat? Do animal tongues work the same as ours? Why do cats have only 8 toes but 10 fingers? What is the most dangerous thing in our kitchen for our pets? Why are most orange cats boys? Where are Australian Shepherds *really* from?), participate in group problem-solving, decipher animal optical illusions, and more!

Each session includes a curbside adoption event where each student can adopt a stuffed animal companion (leash, collar, and tag included) to help them learn along the way!

NEW TOPICS THIS SESSION!

- **Perform Your Own Veterinary Exam • Pet Parasites • Pet Adoption! • Dog & Cat Geography •**
- **Gross Things (barf, poop, guts, and blood) • Animals of the Lunar New Year •**

Dr. Pam Wittenberg has 30 years of experience in veterinary medicine. When she's not teaching kids about the wonders of science and veterinary medicine, she works as a veterinarian, and teaches human and veterinary anatomy classes at SRJC.
